- (l) The Statute of the Bank provides that the Bank shall ensure that its funds are used as rationally as possible in the interests of the European Union; and, accordingly, the terms and conditions of the Bank's loan operations must be consistent with relevant policies of the European Union.
- (m) The Bank considers that access to information plays an essential role in the reduction of environmental and social risks, including human rights violations, linked to the projects it finances and has therefore established its transparency policy, the purpose of which is to enhance the accountability of the Bank's group towards its stakeholders.
- (n) The processing of personal data shall be carried out by the Bank in accordance with applicable European Union legislation on the protection of individuals with regard to the processing of personal data by the European Union institutions and bodies and on the free movement of such data.
- (o) By entering into this Contract the Borrower acknowledges that the Bank is bound to comply with the Sanctions (as defined below) and that the Bank cannot, therefore, amongst others, make funds available, directly or indirectly, to or for the benefit of a Sanctioned Person (as defined below).
- (p) The Bank supports the implementation of international and EU standards in the field of anti-money laundering and countering the financing of terrorism and promotes tax good governance standards. It has established policies and procedures to avoid the risk of misuse of its funds for purposes which are illegal or abusive in relation to applicable laws. Project Specification and Reporting**A.1 TECHNICAL DESCRIPTION****A.1.1 Purpose, Location**

The Project aims to support multi-sector investment Sub-Projects in the municipal and social infrastructure sectors to cope with the consequences of the conflict in eastern Ukraine that ravaged parts of this region between March and early September 2014 and is still on-going.

The Project covers three geographical areas:

- (a) the conflict-affected areas in the Donetsk and Luhansk oblasts under control of the Ukrainian Government;
- (b) the four surrounding oblasts (Kharkiv, Dnipropetrovsk, Kherson and Zaporizhzhia), which are under heavy pressure on social services and other infrastructure due to the influx of IDPs and other disruptions related to the conflict; and
- (c) specific local councils in other oblasts that are hosting significant influxes of IDPs to help addressing the increased pressure on social infrastructure and housing. The operation is expected to provide financing to several Sub-Projects supporting economic development and resilience in the Azov Sea region (Donetsk, Kherson, Zaporizhzhia oblasts), in line with the EU action for the Azov Sea region.

A.1.2 Description

Building on the previous operation, Ukraine Early Recovery Programme (UERP), the proposed project aims at supporting investments in critical social infrastructure (such as rehabilitation, construction and energy efficiency for housing, schools, health facilities and social centres; reestablishment/recovery of water, wastewater infrastructure; rehabilitation/recovery of local and regional roads and bridges, and other relevant infrastructure) in affected areas and basic needs to ensure decent living conditions for displaced people and host communities.

The loan can also be utilized to finance the appointment of consultants and experts to support the management, co-ordination, monitoring, planning, design and supervision of the Project

Final Beneficiaries will be limited to the central governmental bodies of the Borrower, local state administrations, bodies of local self-government, and state and communal enterprises other than private enterprises whose compensations for repair and reconstruction will be the responsibility of the Borrower. Final Beneficiaries will have to comply with public procurement rules in agreement with the relevant EIB guidelines on procurement.

The following table specifies the type of works that are primarily targeted within the sectors eligible for this framework facility:

Sector	Activity
Housing	Recovery, upgrading and construction of infrastructure for housing; recovery or construction of heating systems; recovery, improvement of the energy efficiency measures.
Water Supply and Sanitation	Recovery, reestablishment and construction of water supply, rationalization of use of water resources; repairing and upgrading of networks, water supply, pumping stations and treatment plants at regional and municipal level.
District Heating	Recovery and upgrading of district heating generation, transmission and distribution.
Public Buildings	Recovery, refurbishing and construction of public buildings (hospitals, schools, community centers, postal services providing financial services, public administration buildings). Recovery and improvement of energy efficiency in public buildings.
Transportation	Recovery and reestablishment of local and regional roads and bridges and other relevant infrastructure. Recovery and reestablishment of urban transportation infrastructure and pedestrian paths, and replacement of destroyed urban transportation equipment.

A.1.3 Calendar

The Project is expected to have an implementation period of 4-5 years following Finance Contract signature in 2020. Project completion is thus estimated to be no later than end of 2026.

A.1.4 General Provisions

2.14 Water Tariffs

2.14.1 Current fixed component independent from consumption

- Indicate the component that is billed for the provision of service (such as a charge per meter, per connection, per capita, per property) or on any other basis (such as debt repayment fee) and that has nothing to do with the consumption. Do not confuse with lump sum billing (see 2.14.2)
- Where relevant distinguish for water and wastewater and further to categories, such as user groups (domestic, commercial, etc.), meter diameter, etc.
- Indicate the relevant amount(s) with the frequency of billing (monthly, quarterly, yearly, etc.)
- If there is no independent fixed component please indicate "n.a." (not applicable)

2.14.2 Current fixed component for consumption ("lump sum")

- In case there are no customer meters, customers might be billed on the basis of a lump sum. In case only a part of customer is billed that way, please indicate their number or the percentage of total.
- Where relevant distinguish for water and wastewater and further to categories, such as user groups (domestic, commercial, etc.), meter diameter, etc.
- Indicate the relevant amount(s) with the frequency of billing (monthly, quarterly, yearly, etc.)
- If there is no fixed "lump sum" component please indicate "n.a." (not applicable)

- Please indicate all applicable taxes (such abstraction tax, pollution tax, water fund, wastewater fund, etc.)
- Please indicate for all taxes as well as for VAT the calculation basis (such xx UAH/m³ or xx % of A, B or A+B, etc.)
- Indicate the relevant amount(s) and or percentages with the frequency of billing (monthly, quarterly, yearly, etc.)

2.14.4 Tariff evolution

Describe the required and the planned evolution of tariffs over the next few years. In case water or wastewater infrastructure is created in a village or town where there was no such infrastructure before, the calculation of tariffs required to recover at least the O&M cost given in 2.12 is mandatory

2.15 Sub-Project indicators

Please select the relevant indicators

2.15.1 Water Supply

Capacity of water treatment plant constructed or rehabilitated	m ³ /day
Length of water mains or distribution pipes built or upgraded	km
House connections created or rehabilitated	nr
Population benefiting from safe drinking water	inhabitants
Energy consumption water supply	kWh/m ³
Non-revenue water	%
Service level	%

2.15.2 Wastewater

Capacity of sewage treatment plant constructed or rehabilitated	p.e
Length of sewer and or storm water built or upgraded	km
Connections to sanitation services created or rehabilitated	nr
Population benefiting from sanitation services	inhabitants
Energy consumption sewerage	kWh/m ³

2.16 Cash Flow of Utility

Provide summary breakdown of budget for the operator (typically the PCE), showing different sources of income and operational and capital expenditure, including for the non-water and sanitation sectors and transfers from/to the municipality. A business plan can also serve for the above purpose. The data should cover ideally the 3 past years plus the 3 coming years (i.e. including the effects of the project).

2.17 Economic cost-benefit analysis

For capital investment projects with a cost of more than EUR 5 million equivalent, the economic viability of the project should be demonstrated through an economic cost-benefit analysis covering the construction period plus an operations period of at least 25 years (including estimates of economic rate of return and economic net present value). The projected economic cost and benefit streams should reflect data provided in previous sections. Figures should be in constant prices, and should include details of the various costs and benefits.

2.18 Financial sustainability analysis

For capital investment projects with a cost of more than EUR 5 million equivalent, the financial sustainability of the project should be demonstrated through a cashflow analysis covering the construction period plus an operations period of at least 25 years (including estimates of financial rate of return and financial net present value). The cash flow projections should reflect data provided in previous sections. Figures should be in constant prices, and should include details of the various revenue sources and operational and capital (including replacement) expenditures.

2.19 Affordability analysis

For capital investment projects with a cost of more than EUR 5 million equivalent, the affordability of water supply and/or wastewater services should be demonstrated by estimating the average water supply and/or wastewater bill of a low-income household in the service area of the operator as a percentage of the expenditure budget of a low-income household, and compare this percentage with the official affordability limit (in case there is no official affordability limit, the internationally accepted limit of 3% applies to water supply services, and 2% to wastewater services).

All assumptions should be clearly stated and justified.

Definition of ERIBOR

"EURIBOR" means:

- (a) in respect of a relevant period of less than one month, the Screen Rate (as defined below) for a term of one month;
- (b) in respect of a relevant period of one or more months for which a Screen Rate is available, the applicable Screen Rate for a term for the corresponding number of months; and
- (c) in respect of a relevant period of more than one month for which a Screen Rate is not available, the rate resulting from a linear interpolation by reference to two Screen Rates, one of which is applicable for a period next shorter and the other for a period next longer than the length of the relevant period,

(the period for which the rate is taken or from which the rates are interpolated being the "Representative Period").

For the purposes of paragraphs (a) to (c) above:

- (i) "available" means the rates, for given maturities, that are calculated and published by Global Rate Set Systems Ltd (GRSS), or such other service provider selected by the European Money Markets Institute (EMMI), or any successor to that function of EMMI, as determined by the Bank; and
- (ii) "Screen Rate" means the rate of interest for deposits in EUR for the relevant period as published at 11h00, Brussels time, or at a later time acceptable to the Bank on the day (the "Reset Date") which falls 2 (two) Relevant Business Days prior to the first day of the relevant period, on Reuters page EURIBOR 01 or its successor page or, failing which, by any other means of publication chosen for this purpose by the Bank.

If such Screen Rate is not so published, the Bank shall request the principal offices of four major banks in the euro-zone, selected by the Bank, to quote the rate at which EUR deposits in a comparable amount are offered by each of them, as at approximately 11:00 a.m., Brussels time on the Reset Date to prime banks in the euro-zone interbank market for a period equal to the Representative Period. If at least 2 (two) quotations are provided, the rate for that Reset Date will be the arithmetic mean of the quotations. If no sufficient quotations are provided as requested, the rate for that Reset Date will be the arithmetic mean of the rates quoted by major banks in the euro-zone, selected by the Bank, at approximately 11:00 a.m., Brussels time, on the day which falls 2 (two) Relevant Business Days after the Reset Date, for loans in EUR in a comparable amount to leading European banks for a period equal to the Representative Period. The Bank shall inform the Borrower without delay of the quotations received by the Bank.

All percentages resulting from any calculations referred to in this Schedule will be rounded, if necessary, to the nearest one thousandth of a percentage point, with halves being rounded up.

If any of the foregoing provisions becomes inconsistent with provisions adopted under the aegis of EMMI (or any successor to that function of EMMI as determined by the Bank) in respect of EURIBOR, the Bank may by notice to the Borrower amend the provision to bring it into line with such other provisions.

If the Screen Rate becomes permanently unavailable, the EURIBOR replacement rate will be the rate (inclusive of any spreads or adjustments) formally recommended by (i) the working group on euro risk-free rates established by the European Central Bank (ECB), the Financial Services and Markets Authority (FSMA), the European Securities and Markets Authority (ESMA) and the European Commission, or (ii) the European Money Market Institute, as the administrator of EURIBOR, or (iii) the competent authority responsible under Regulation (EU) 2016/1011 for supervising the European Money Market Institute, as the administrator of the EURIBOR, (iv) the national competent authorities designated under Regulation (EU) 2016/1011, or (v) the European Central Bank.

If no Screen Rate and/or the EURIBOR replacement rate is available as provided above, EURIBOR shall be the rate (expressed as a percentage rate per annum) which is determined by the Bank to be the all-inclusive cost to the Bank for the funding of the relevant Tranche based upon the then applicable internally generated Bank reference rate or an alternative rate determination method reasonably determined by the Bank.
